Occupational Employment and Wages in Tallahassee – May 2017

Workers in the Tallahassee Metropolitan Statistical Area had an average (mean) hourly wage of \$21.34 in May 2017, about 12 percent below the nationwide average of \$24.34, according to the U.S. Bureau of Labor Statistics. Regional Commissioner Janet S. Rankin noted that, after testing for statistical significance, 16 groups had significantly lower wages than their respective national averages, including business and financial operations; computer and mathematical; and construction and extraction. No occupational group in the Tallahassee Metropolitan Statistical Area had a significantly higher wage than its respective national average.

When compared to the nationwide distribution, local employment was more highly concentrated in 9 of the 22 occupational groups, including business and financial operations; education, training, and library; and legal. Conversely, seven groups had employment shares significantly below their national representation, including production; transportation and material moving; and personal care and service. (See [table A](#) and [box note](#) at end of release.)

Table A. Occupational employment and wages by major occupational group, United States and the Tallahassee Metropolitan Statistical Area, and measures of statistical significance, May 2017

Major occupational group	Percent of total employment		Mean hourly wage		
	United States	Tallahassee	United States	Tallahassee	Percent difference ⁽¹⁾
Total, all occupations	100.0	100.0	\$24.34	\$21.34*	-12
Management	5.1	(2)	57.65	(2)	-
Business and financial operations	5.2	9.9*	36.70	25.25*	-31
Computer and mathematical	3.0	3.4*	43.18	30.65*	-29
Architecture and engineering	1.8	1.1*	41.44	32.19*	-22
Life, physical, and social science	0.8	1.2*	35.76	25.51*	-29
Community and social service	1.5	1.8*	23.10	19.65*	-15
Legal	0.8	2.0*	51.62	45.52	-12
Education, training, and library	6.1	7.7*	26.67	22.82*	-14
Arts, design, entertainment, sports, and media	1.4	1.4	28.34	29.21	3
Healthcare practitioners and technical	6.0	5.9	38.83	34.90*	-10
Healthcare support	2.9	3.2*	15.05	13.40*	-11
Protective service	2.4	3.0*	22.69	21.24*	-6
Food preparation and serving related	9.3	10.0*	11.88	11.93	0
Building and grounds cleaning and maintenance	3.1	3.3	13.91	11.83*	-15
Personal care and service	3.6	2.4*	13.11	13.23	1
Sales and related	10.2	9.8	19.56	16.10*	-18
Office and administrative support	15.4	14.8*	18.24	15.65*	-14
Farming, fishing, and forestry	0.3	0.2*	13.87	13.11	-5
Construction and extraction	4.0	3.2*	24.01	17.61*	-27
Installation, maintenance, and repair	3.9	3.8	23.02	19.27*	-16
Production	6.3	1.9*	18.30	15.61*	-15

Note: See footnotes at end of table.

Table A. Occupational employment and wages by major occupational group, United States and the Tallahassee Metropolitan Statistical Area, and measures of statistical significance, May 2017 - Continued

Major occupational group	Percent of total employment		Mean hourly wage		
	United States	Tallahassee	United States	Tallahassee	Percent difference ⁽¹⁾
Transportation and material moving	7.0	4.1*	17.82	14.12*	-21

Footnotes:

(1) A positive percent difference measures how much the mean wage in the Tallahassee Metropolitan Statistical Area is above the national mean wage, while a negative difference reflects a lower wage.

(2) Estimate not released

* The percent share of employment or mean hourly wage for this area is significantly different from the national average of all areas at the 90-percent confidence level.

- Data not available.

One occupational group—business and financial operations—was chosen to illustrate the diversity of data available for any of the 22 major occupational categories. Tallahassee had 16,770 jobs in business and financial operations occupations, accounting for 9.9 percent of local area employment, significantly higher than the 5.2-percent share nationally. The average hourly wage for this occupational group locally was \$25.25, significantly below the national wage of \$36.70.

Some of the larger detailed occupations within the business and financial operations group included management analysts (5,200), accountants and auditors (2,360), and compliance officers (1,600). Among the higher paying jobs in this group were loan officers and cost estimators, with mean hourly wages of \$33.28 and \$32.44, respectively. At the lower end of the wage scale were tax examiners and collectors, and revenue agents (\$15.91) and compensation, benefits, and job analysis specialists (\$18.07). (Detailed data for business and financial operations occupations are presented in [table 1](#); for a complete listing of detailed occupations available, go to www.bls.gov/oes/current/oes_45220.htm.)

Location quotients allow us to explore the occupational make-up of a metropolitan area by comparing the composition of jobs in an area relative to the national average. (See [table 1](#).) For example, a location quotient of 2.0 indicates that an occupation accounts for twice the share of employment in the area than it does nationally. In the Tallahassee Metropolitan Statistical Area, above-average concentrations of employment were found in several of the occupations within the business and financial operations group. For instance, tax examiners and collectors, and revenue agents were employed at 10.6 times the national rate in Tallahassee, and management analysts, at 6.7 times the U.S. average. On the other hand, training and development specialists had a location quotient of 1.1 in Tallahassee, indicating that this particular occupation's local and national employment shares were similar.

These statistics are from the Occupational Employment Statistics (OES) survey, a federal-state cooperative program between BLS and State Workforce Agencies, in this case, the Florida Department of Economic Opportunity.

Notes on Occupational Employment Statistics Data

With the release of the May 2017 estimates, the OES program has replaced 21 detailed occupations found in the 2010 Standard Occupational Classification (SOC) with 10 new aggregations of those occupations. In addition, selected 4- and 5-digit North American Industry Classification System (NAICS) industries previously published by OES will no longer be published separately. Some of the 4-digit NAICS industries that are no longer being published separately will instead be published as OES-specific industry aggregations. More information about the new occupational and industry aggregations is available at www.bls.gov/oes/changes_2017.htm.

A value that is statistically different from another does not necessarily mean that the difference has economic or practical significance. Statistical significance is concerned with the ability to make confident statements about a universe based on a sample. It is entirely possible that a large difference between two values is not significantly different statistically, while a small difference is, since both the size and heterogeneity of the sample affect the relative error of the data being tested.

Technical Note

The Occupational Employment Statistics (OES) survey is a semiannual mail survey measuring occupational employment and wage rates for wage and salary workers in nonfarm establishments in the United States. The OES data available from BLS include cross-industry occupational employment and wage estimates for the nation; over 650 areas, including states and the District of Columbia, metropolitan statistical areas (MSAs), metropolitan divisions, nonmetropolitan areas, and territories; national industry-specific estimates at the NAICS sector, 3-, 4-, and selected 5- and 6-digit industry levels; and national estimates by ownership across all industries and for schools and hospitals. OES data are available at www.bls.gov/oes/tables.htm.

OES estimates are constructed from a sample of about 1.2 million establishments. Each year, two semiannual panels of approximately 200,000 sampled establishments are contacted, one panel in May and the other in November. Responses are obtained by mail, Internet or other electronic means, email, telephone, or personal visit. The May 2017 estimates are based on responses from six semiannual panels collected over a 3-year period: May 2017, November 2016, May 2016, November 2015, May 2015, and November 2014. The overall national response rate for the six panels, based on the 50 states and the District of Columbia, is 72 percent based on establishments and 68 percent based on weighted sampled employment. The unweighted sample employment of 82 million across all six semiannual panels represents approximately 58 percent of total national employment. The sample in the Tallahassee Metropolitan Statistical Area included 1,698 establishments with a response rate of 78 percent. For more information about OES concepts and methodology, go to www.bls.gov/oes/current/oes_tec.htm.

The May 2017 OES estimates are based on the 2010 Standard Occupational Classification (SOC) system and the 2017 North American Industry Classification System (NAICS). Information about the 2010 SOC is available on the BLS website at www.bls.gov/soc and information about the 2017 NAICS is available at www.bls.gov/bls/naics.htm.

Metropolitan area definitions

The substate area data published in this release reflect the standards and definitions established by the U.S. Office of Management and Budget.

The **Tallahassee Metropolitan Statistical Area** includes Gadsden, Jefferson, Leon, and Wakulla Counties Florida.

Additional information

OES data are available on our regional web page at www.bls.gov/regions/southeast. Answers to frequently asked questions about the OES data are available at www.bls.gov/oes/oes_ques.htm. Detailed technical information about the OES survey is available in our Survey Methods and Reliability Statement on the BLS website at www.bls.gov/oes/current/methods_statement.pdf.

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: (202) 691-5200; Federal Relay Service: (800) 877-8339.

Table 1. Employment and wage data from the Occupational Employment Statistics survey, by occupation, Tallahassee Metropolitan Statistical Area, May 2017

Occupation ⁽¹⁾	Employment		Mean wages	
	Level ⁽²⁾	Location quotient ⁽³⁾	Hourly	Annual ⁽⁴⁾
Business and financial operations occupations	16,770	1.9	\$25.25	\$52,530
Buyers and purchasing agents	290	0.6	24.47	50,890
Claims adjusters, examiners, and investigators	720	2.2	24.41	50,780
Compliance officers	1,600	4.7	20.03	41,650
Cost estimators	170	0.7	32.44	67,480
Human resources specialists	820	1.3	22.65	47,110
Labor relations specialists	130	1.4	24.11	50,150
Logisticians	70	0.4	27.85	57,930
Management analysts	5,200	6.7	25.62	53,280
Meeting, convention, and event planners	140	1.1	24.24	50,430
Fundraisers	180	2.1	31.36	65,220
Compensation, benefits, and job analysis specialists	(5)	(5)	18.07	37,590
Training and development specialists	380	1.1	24.36	50,680
Market research analysts and marketing specialists	520	0.7	29.70	61,780
Business operations specialists, all other	1,520	1.3	30.32	63,070
Accountants and auditors	2,360	1.6	25.69	53,430
Appraisers and assessors of real estate	(5)	(5)	18.54	38,560
Budget analysts	140	2.2	28.80	59,910
Financial analysts	410	1.2	26.67	55,470
Personal financial advisors	130	0.6	62.93	130,900
Insurance underwriters	60	0.5	28.34	58,940
Financial examiners	70	1.1	21.74	45,220
Loan officers	220	0.6	33.28	69,220
Tax examiners and collectors, and revenue agents	710	10.6	15.91	33,100
Tax preparers	100	1.3	23.49	48,860
Financial specialists, all other	190	1.3	21.53	44,790

Footnotes:

(1) For a complete listing of all detailed occupations in the Tallahassee Metropolitan Statistical Area, see www.bls.gov/oes/current/oes_45220.htm

(2) Estimates for detailed occupations do not sum to the totals because the totals include occupations not shown separately. Estimates do not include self-employed workers.

(3) The location quotient is the ratio of the area concentration of occupational employment to the national average concentration. A location quotient greater than one indicates the occupation has a higher share of employment than average, and a location quotient less than one indicates the occupation is less prevalent in the area than average.

(4) Annual wages have been calculated by multiplying the hourly mean wage by a "year-round, full-time" hours figure of 2,080 hours; for those occupations where there is not an hourly mean wage published, the annual wage has been directly calculated from the reported survey data.

(5) Estimate not released.
